DETAILED ACTION

1. Claims 1-40 currently pending in the application.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 31 are rejected under 35 U.S.C. 102(b) as being anticipated by Donovan et al (US 6,122,281).

Claims 1 and 31, Donovan et al discloses a method of combining TDM data and data packets comprising: receiving a plurality of TDM data columns; receiving a plurality of data packets; transforming a first subset of the data packet into one or more TDM packet columns; and combining the TDM packet columns with a first subset of the TDM data columns to form a data payload of an outgoing TDM data frame (see figure 8 and 9).

Allowable Subject Matter

4. Claims 16-30 allowed over prior art made of record.
5. Claims 2-15 and 32-40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2616

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Renoulin et al (US 4,549,291) discloses a hybrid local communication network, operating both in circuit and packet nodes.
